WORK EXPERIENCE

Software Engineer
M2H LLP
08/2022 - Present
Java/Angular
- Collaborated with the team to add new features to the application and improve its functionality
- Worked on resolving existing bugs in the application to improve overall stability and user experience
- Worked on the implementation of CRUD operations on the database using Hibernate query language (HQL)
- Assisted in the development and implementation of database schema using Hibernate annotations.
- Collaborated in the development of an Angular-based admin portal for a financial servicing software, providing an intuitive and user-friendly interface for managing critical data.
- Implemented Angular and Material UI to create a responsive and visually appealing admin portal, ensuring seamless navigation and an enhanced user experience.
- Leveraged Angular's powerful API integration capabilities to fetch data from a SQL server, enabling real-time data updates and synchronization.
- Worked closely with a cross-functional team to ensure seamless integration between the Angular frontend and the SQL server, optimizing performance and maintaining data integrity.

Freelancer
Nexwave
02/2022 - 03/2023   *India*
React/Next JS
- Developed responsive and user-friendly websites using React, Next.js, HTML, CSS, and JavaScript.
- Collaborated with clients to gather requirements and translate them into functional website designs.
- Utilized modern CSS techniques (such as Flexbox and Grid) to create visually appealing layouts.
- Maintained clean and organized codebase, following best practices and coding conventions.
- Provided ongoing support and maintenance for websites, addressing client requests and fixing any issues that arise.

Data Analyst Intern
Xena Intelligence
12/2021 - 01/2022   *India*
Excel/Tableau
- Pre-processed data using Ms Excel and SQL
- Identified techniques and data to understand variables relationship
- Analysed and Summarised Data
- Visualized data using Tableau
- Delivered final reports and technical documents.

PERSONAL PROJECTS

Project Name
- Developed a full responsive website clone of Microsoft using HTML and CSS, showcasing proficiency in creating visually appealing and user-friendly designs.
- Implemented a LinkedIn clone using React.js, gaining familiarity with Redux for state management and demonstrating the ability to work with complex frameworks.
- Created a notes application using React.js and integrated it with a MongoDB database using Mongoose, enabling CRUD operations for efficient note management
- Created custom websites for clients using Next.js, leveraging server-side rendering for enhanced performance, and seamless user experience.
